3.5 Domestic Interest Payments

As at end of August 2025, the actual domestic interest payment amounted to Ksh 145.28 billion against an annual target of Ksh 851.42 billion for FY 2025/26. Interest payments for Treasury bonds and bills in the month of August 2025 amounted to Ksh 84.40 billion

and Ksh 7.12 billion, respectively. The total interest payment on the overdraft and interest on the Pre-1997 Government Overdraft was Ksh 0.47 billion.

3.6 Government Securities Yields

Chart 7 shows Government Securities Yield Curve where in June 2022, the yield curve exhibited a normal upward sloping shape reflecting a normal term premium and healthy economic expectations and liquidity. In June 2023, the curve appeared humped suggesting intermediate maturities yielded more than short and long ends, indicating uncertainty and market distortion. This was likely driven by high government borrowing and tightened liquidity. In June 2024, the

curve was still characterized by the humped shape, though with peak yields retreating from previous highs in late 2023. This indicated sustained elevated borrowing costs, driven by cyclical fiscal pressures. Meanwhile, in June 2025, the yield curve was at its lowest since 2022 especially for government securities in the mid-to-long end with a steeply inverted shape driven by fiscal pressures and investor risk aversion. This indicates that term premiums are higher for longer maturities. In August 2025, the yield curve was steeply upward sloping. This alignment reflects relatively low yields at the short end and elevated yields at the long end.

3.7 Average Time to Maturity for Treasury Bonds

The Average Time to Maturity (ATM) for Treasury Bonds in the month of August 2025 was 7.60 years, relatively the same as July 2025 ATM.

4.0 Sovereign Credit Rating

On August 22, 2025, S&P Global upgraded Kenya's long-term sovereign credit rating to B from B-, maintaining a stable outlook. This upgrade was driven by strengthened foreign exchange reserves, robust export earnings, and consistent diaspora remittances, all of which have helped ease near-term external liquidity pressures. Earlier, on February 25, 2025, S&P assigned a B- rating with a stable outlook, a view that was later affirmed by Fitch Ratings on July 25, 2025. Meanwhile, Moody's maintained Kenya's CaaI rating for both local and foreign currency long-term issuer obligations but revised the outlook from negative to positive on January 25, 2025. This shift reflects growing confidence in Kenya's fiscal and external financing prospects. Kenya's efforts in Eurobond liability management and recent monetary easing have also contributed to smoother debt amortization and stimulated private-sector credit growth. These measures have helped to position the country more favourably in the eyes of international lenders and investors.
